The New York Tribune thinks the prospect for a split in the Democratic party is very brilliant. The voters of that organization never stay at home and never fail to support the ticket. They vote early and often and they never become weary. The new party prophet should consider these qualities and shut up shop.

Henry Ward Beecher made Gilman and his followers the subject of his sermon at the meeting the other evening, and said: "For a week past or more I have been under a cloud. Mr. Gilman, my nephew by marriage, has been sent to Auburn for five years, and is in Auburn to-night. He married a daughter of my sister, Mrs. Perkins."

A seven-year-old boy is missing in Philadelphia. A little playmate says: "We went into an empty room and played there a long time, and when we came out some boys came by and pulled the door shut and Willie was inside;" but he has no idea where the house is. The police are to search every unoccupied house in the city.

Roberts, is being built at Stockton, which is designed to revolutionize all previous methods of working tule lands, being capable of working fifty acres per day, ready for seeding, cutting a swath eighteen feet in width, and a depth of from three inches to three feet.

Diphtheria has become so prevalent and deadly in and about Jackson, Ariz. county, that the Dispatch suggests a general meeting of the citizens of Jackson to be held to see if some means cannot be arrived at whereby the spread of that dreadful disease may be checked. A wet winter is what the San Jose Herald predicts, based as follows: There is a certain species of rat known here as the water rat. In ordinary seasons the animal builds its house or nest close to the edge of the water courses, but in seasons that its instincts teach it will be especially wet, it builds its nest in the trees or bushes. This fall the weather-wise rodents are housing in the bushes.

Forty-seven failures were reported in New York during the month of September, together with a large number of assignments and adjudications in bankruptcy. The aggregate liabilities in round numbers for the month were \$4,000,000. The number of failures is the largest of any month this year, and is an increase of 20 per cent. over the month of August, and all because of currency stringency.

The Eureka Sentinel of October 9th says: A magnificent specimen of almost pure silver weighing sixty-four pounds, a production of the Filadelfia mine, was received in Eureka, and forwarded to the mint at San Francisco. It was taken out by Messrs. Durning & Bell, the proprietors of the property, and sent by them to the bay where it was placed on a raft, and then by rail to the richness and productiveness of the mine.

The cactus paper mill of Capt. Walker is in full blast in the Soledad. It makes two tons of pulp a day. They have not yet manufactured any news paper, but are about to start in on its manufacture. About twenty men are employed cutting the cactus and reducing it to a pulp.

A number of tramps were ordered out of a chestnut tree by Louis Schaler, a farmer of Sanbury, Pa. The other day, they drove him to his house with a pistol. Nothing has been seen or heard of them since.

What a terrible picture of the horrors of the war in the East is this, from a late dispatch. Every house in Koznik is a hospital. The place reeks with the fever stench. All the country from Shipka to Yenik Saghna can only be ridden over with camphor in one's mouth. Dead bodies are lying on the roadsides and in the fields and gardens. From 400 to 600 bodies are in Yenik Saghna, and have been there ever since the battle, some weeks ago.

Says the Napa Reporter: When the Northern railroad from Oakland to Martinez, and Benicia to Fairfield had been finished, it is proposed to construct a partially new line to connect the Napa Valley road with Benicia. The present road from the junction towards Vallejo will be used to a short distance of Vallejo, when a turn to the left will be made, and a new road constructed through the Sulphur Springs Canyon to Benicia.

Texas has a prodigy in command of its troops on the border. A correspondent of the Galveston News thus describes him: Impetuous to the extremes of cold or heat, able to endure the tortures of hunger and thirst, a Bedouin in the saddle, he leads his wild warriors through the gloom of midnight along the forest trail, and the wolf and the owl fly from his path, but the red-dressed murderer he drags into light, to toll in chains or dangle at a rope end, as justice dictates him.

A writer to the London Lancet says: "A few years ago, while in China, I became acquainted with the fact that the natives, when suffering from febrile neuritis, applied oil of pepper to the seat of the pain, with a camel hair pencil.
